

# Saigon Sister: Backend Architecture

774 Yonge Street, Toronto · Node.js + Express + SQLite

Reference doc for database design, auth flow, and API shape.

## System overview

## ER diagram (4 tables)

### Menu and daily specials

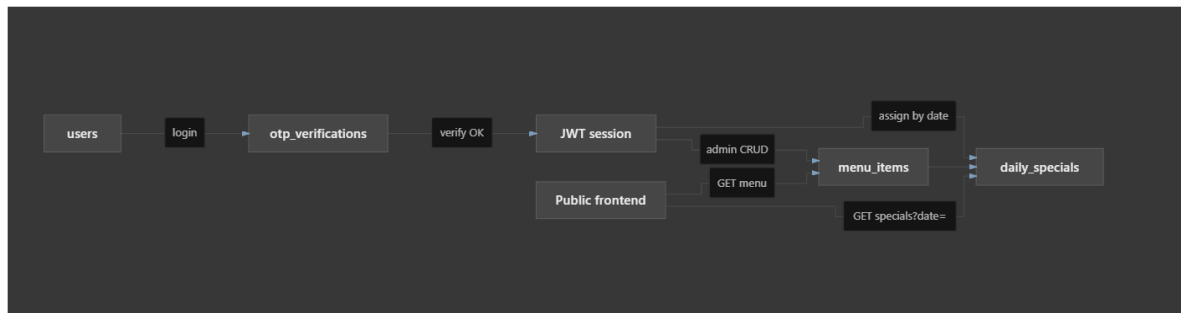

### Users and OTP verifications

## Table notes

| Table             | Purpose                                                           |
|-------------------|-------------------------------------------------------------------|
| users             | Single admin account (username + bcrypt password + email for OTP) |
| menu_items        | Full menu; category is one of four fixed values                   |
| otp_verifications | Temporary 6-digit codes; expire after 5 minutes                   |
| daily_specials    | Which menu item is featured on which date                         |

## OTP workflow

| Step | Endpoint                  | Auth                          |
|------|---------------------------|-------------------------------|
| 1    | POST /api/auth/login      | Public                        |
| 2    | Email OTP (nodemailer)    | n/a                           |
| 3    | POST /api/auth/verify-otp | Public, returns JWT           |
| 4    | Menu write routes         | Authorization: Bearer <token> |

Mail sent from `noreply@saigonsisterrestaurant.com` to admin `users.email`.

After JWT: admin CRUD on `menu_items` , assign `daily_specials` by date, public frontend reads menu and specials.

## Menu taxonomy

### Categories (4 only)

plaintext

breakfast · lunch · dinner · drink

Stored on `menu_items.category` . API filter: `GET /api/menu?category=lunch`

### Tags (5)

| Tag      | Meaning                      |
|----------|------------------------------|
| vegan    | Plant-based option           |
| must-try | House signature              |
| creation | Saigon Sister original       |
| spicy    | Spicy dish or rim            |
| seafood  | Fish, shrimp, tuna, calamari |

Stored as JSON array on `menu_items.tags` . API filter: `GET /api/menu?tag=vegan`

Seed data: `[menu-data.json](./menu-data.json)` , 101 items.

## API map
